

The Honorable Michael K. Powell  
Chairman  
Federal Communications Commission  
445 12th Street, S.W.  
Washington, D.C. 20554

Dear Chairman Powell:

I'm writing to urge you to support the proposed merger of EchoStar Communications and Hughes Electronics. I am absolutely certain the merger holds tremendous potential for our company here in CA which markets EchoStar's DISH Network satellite TV service. The new company will offer a more solid product to consumers, and this will mean a more fair and equal business opportunity for my struggling company.

The majority of my customers are simply not able to subscribe to their local broadcast channels via satellite because they live in a small television market. This is the case because DISH Network does not have sufficient spectrum to provide all local channels in every one of the country's 210 local television markets. Currently, EchoStar offers local broadcast channels in only 36 markets. The merger will allow the combined company to stop broadcasting more than 500 IDENTICAL T.V. channels. This will increase capacity and allow the new company to serve all TV markets in the U.S. This will allow me to offer my customers a more competitive alternative to cable in the near future.

My customers are tired of dealing with the monopolistic nature of their local cable companies, but what can they do? They have their hands tied...as do I, and thousands of alternative TV providers like me.

Not to mention the millions of customers that reside outside the domain of the cable empire, and have to watch their local weather report on a CNN feed from Atlanta.

This IS the 21st century...

If the merger is approved, the new EchoStar will provide consumers in my area an affordable high speed Internet access service via satellite. There are a small number of customers in my area who do enjoy access to high-speed Internet access service via cable and DSL service. For them, this merger will result in increased competition in the broadband market, potentially driving down prices of DSL and cable providers. However, the majority of the homes, schools and businesses in my area are beyond the reach of cable and DSL wires. For these customers, the new EchoStar would be their only chance of getting an affordable high speed Internet service.

Whether or not my customers have access to cable, and most do not, all of them will benefit from the new company's ability to better compete with cable. EchoStar has pledged to offer nationwide prices and services -- bringing the benefits of vigorous competition with cable -- to customers everywhere.

High Definition Television (HDTV) was supposed to be available to the American public today, but consumers are still waiting for broadcasters and cable operators to provide the service. EchoStar and Hughes have pledged to use some of the available spectrum to increase their HDTV channel offerings, more than tripling their current HDTV offerings. I am excited because greater availability of HDTV programming will translate into more sales opportunities for my HDTV televisions and related products.

The new company will offer many benefits to customers, but the most important one is local broadcast channels via satellite in all U.S. television markets. This is the one service most sought after by my customers. I urge you to support the proposed merger between EchoStar and DIRECTV because local channels for all Americans is only possible if the companies are allowed to combine.

Sincerely,

Douglas Quayle
